

THE NATIONAL INSTITUTE FOR SUSTAINABLE DEVELOPMENT

P.O BOX 28-BANGEM BUEA

Relevant activities linked to Improving Road Safety , 2024-2025 in point format

1. Advocating and sensitization workshops involving a comprehensive safe system approach which focuses on safer infrastructure, vehicles and driver behaviour. We educate local authorities and carried out an including drivers and bike riders advocating for reduced speeds limits in high risk areas, enforcing traffic laws and improving road designs.
2. Information dissemination and awareness- We run public information sensitization campaigns to educate drivers about the risks of excess speeding and poor state of cars.
3. We work and inform local authorities about fixing dangerous areas, identifying and repairing black spots on roads where accidents frequently occur.
4. We support local authorities materially and with technical skills to build speed humps, curb extensions and build roundabouts to naturally slow traffic as per road infrastructure procedures.
5. We also work with town and city authorities to improve road surfaces, putting signage, lighting and creating dedicated lanes for pedestrians and cyclists.
6. We organised workshops on speed management, eliminating distractions, impairment prevention and safety equipment. By focusing entirely on driving and avoiding phones reduces rate of accidents. Moreover we also emphasised on the strict enforcement against driving under the influence of alcohol and drugs. We advocate for the mandatory use of seatbelts for car users and use of helmets for motor bike riders.
7. We pushed harder for regulation to be made on the regular maintenance of vehicles ensuring brakes, tires and lights are always in good working conditions. We worked with local transport authorities and rivers union to implement comprehensive driver training and general public awareness campaigns on the safe use of roads.
8. We also supported health and emergency workers by giving trainings on improving emergency medical services and reducing response times to treat road accident injuries.
