P.O BOX 28-Bangem Buea

Relevant activities – 2024-2025 in point format

1. Cleaning of the Ekondo titi, Mabouda and Isangele springs ,a total of 11 springs. Getting rid of plastics and other garbage. A total volunteer number of 45 persons were present to clean the spring. This is imperative because the garbage disposal on the spring site has led to it being unfit for domestic use and even laundry.
2. Sensitization of the local population residing near the spring area on the disadvantages of emptying their waste near the spring. Advising them to stop using plastic bags plastic containers which mostly end up making the spring unfit for use.
3. Provision of home water filters to the population of Eondo Titi so that water collected from the spring can be filtered and used for domestic purposes.
4. Provision of waste bins to river communities of the balongo and the provision of 100 water filters to the village community of balong, idenau for use by community schools,hospitals and houses which depend on river water for drinking and other domestic purposes.
5. Construction of 20 bore holes to satisfy the drinking water needs of the Idabato and Ndian local community. This has been really a breakthrough solution as villagers used to trek miles to fetch water for drinking and cooking.
6. Setting up of bore hole tanks to store water and make sure drinking water is always available even at the peak of the dry season. We also put in place the borehole maintenance office which maintains the boreholes and keeps the water storage tanks in good shape and check water quality and level.

Director of programs
